

KEENAN REIDHEAD

Wyoming, ON | 519-331-4409 | reidheak@mcmaster.ca | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

- Skilled in **SolidWorks**, **MATLAB**, **Unisim**, **SAP** and **AutoCAD**, with experience in programming physical systems with PLC and modelling chemical processes through Unisim.
- Led integration of **SAP** and **Ignition** into Conagra Brands Dresden Plant, improving **progress tracking** and **task completion**, as well as streamlining **parts acquisition methods**.
- Skilled in prototyping using various methods, applying design constraints and tolerances to create functional models and optimize designs for production efficiency and performance.

EXPERIENCE

Engineering Co-Op Student

April 2024 - January 2025

Conagra Brands – Dresden, ON

- Managed capital projects from planning through close-out, coordinating scope, schedules, budgets, and cross-functional stakeholders to ensure successful execution.
- Developed PLC code and produced AutoCAD drawings, incorporating field measurements to support accurate designs and as-built documentation.
- Created comprehensive work packages and handled procurement activities, including purchase requisitions and purchase orders, to support project installation and delivery.
- Applied project management and SQL-based data analysis to track progress, support decision-making, and improve project planning and reporting.

Engineering Intern

September 2021 - January 2022

Wajax Technical Services – Sarnia, ON

- Developed and deployed an advanced camera system for client process observation, increasing monitoring accuracy.
- Installed and configured technical equipment, ensuring compliance with industry standards and enhancing system reliability.

Manufacturing Member

October 2022 - January 2023

Mac Formula Electric – McMaster University

- Designed and manufactured routing and mounting systems for wiring in collaboration with the electrical engineering team to optimize the wiring layout for minimal signal interference and efficient power distribution.

CLUBS & PROJECTS

McMaster Engineering Hockey Club President

- Led club operations by managing the annual budget, coordinating executive and team members, securing and purchasing ice time, and developing schedules to ensure organized and uninterrupted club activities.

Air Quality Health Index Program

- Coded an application that uses collected data of air pollutants of different cities and calculates the Air Quality Health Index in C, with consideration of seasonal conditions.

Unisim Design

- Designed and modeled multiple functional chemical processes including natural gas boilers, demethanization and biodiesel production using CSTRs, PFRs and various other chemical equipment.

CERTIFICATIONS

- Standard First Aid/AED Level C – Red Cross March 2022 - Present
- Emergency First Aid – Red Cross June 2021 - Present
- Lockout-tagout – Conagra Brands April 2024 - Present

EDUCATION

- **Bachelor of Automation Engineering (Co-op) – Year 4**, McMaster University Hamilton, ON
- Advanced Diploma in **Chemical Engineering** 2022 - Present
- **ACBSP Certificate in Business Management**

SKILLS

- Technical Skills: **AutoCAD**, **SolidWorks**, **SAP**, **Chemical Process Modelling**, **Manufacturing Methods**, **Process Design and Simulation**, **Control Systems**, **Statistical Analysis**, **Financial Systems**, **Power Tools**
- Programming Skills/Other: **PLC**, **C++**, **Python**, **Java**, **Excel**, **Word**, **PowerPoint**, **Unisim**, **Minitab**, **Control Systems**, **Statistical Analysis**, **SharePoint**, **Circuitry**, **MATLAB**, **Simulink**, **BOMs**
